PROFESSIONAL SUMMARY

Entry-level professional with a B.Tech in Artificial Intelligence and Data Science and experience in customer support, data handling, and cloud projects. Skilled in Microsoft Excel, SQL, Power BI, Python, and Amazon Web Services (AWS). Accurate with records and documentation, with strong written and verbal communication. Seeking entry-level roles in data, cloud support, or administration.

WORK EXPERIENCE

Sales Executive | Royal Citadel, Dubai, UAE | May 2026 - August 2026

- Handled client calls and inquiries daily, guiding each client through the account opening process
- Followed up with clients by email and WhatsApp, keeping records and client information accurate and consistent
- Prepared pitch decks and portfolio reports from client and market data
- Resolved client questions in real time and explained technical topics in clear, non-technical language

Chat Support Intern | Sutherland Global Services (via Prompt Personnel Pvt Ltd), Chennai, India | November 2025 - December 2025

- Completed structured training in customer chat support, communication, and customer-handling procedures
- Assisted customers through chat by understanding their concerns and providing appropriate support
- Responded to customer queries professionally and guided customers toward resolving their issues
- Delivered timely, customer-oriented support throughout chat interactions

Machine Learning Intern | Eduexpose, Hyderabad, India | April 2025 - May 2025

- Cleaned and preprocessed 50,000+ records with Pandas and NumPy, supporting classification models with 91% accuracy
- Deployed machine learning workflows with Streamlit and Flask connected to SQL databases for real-time data applications
- Improved model training efficiency by 25% through feature engineering, hyperparameter tuning, and pipeline optimization

Machine Learning Intern | Verzeo | November 2022 - December 2022

- Completed a Machine Learning with Python internship program covering supervised and unsupervised learning, regression, classification, and clustering
- Implemented algorithms such as K-Nearest Neighbors (K-NN), Support Vector Machines (SVM), K-Means, and Random Forest using scikit-learn

SKILLS

- **Administration and Data Entry:** Data Accuracy, Record Keeping, Documentation, Report Preparation, Follow-Up, Coordination, Time Management
- **Data and Reporting:** Microsoft Excel, Power BI, SQL, Python, Pandas, NumPy, Data Cleaning, Data Analysis
- **Cloud and IT:** Amazon Web Services (AWS), EC2, S3, RDS, Identity and Access Management (IAM), Virtual Private Cloud (VPC), Lambda, CloudWatch, Linux, Windows, TCP/IP, Troubleshooting
- **Customer Support and Communication:** Customer Support, Chat Support, Client Communication, Team Leadership, Problem-Solving

PROJECTS

3-Tier E-Commerce Architecture on AWS | EC2, RDS MySQL, ALB, Route 53, CloudFront, Lambda | November 2025 - January 2026

- Deployed a scalable 3-tier architecture with EC2 Auto Scaling, RDS MySQL, and Application Load Balancer, achieving 99.9% uptime with CloudWatch dashboards and alarms
- Reduced MySQL query latency by about 40% through index optimization, connection pooling, and query restructuring
- Cut static asset load times by about 35% with Route 53 DNS routing and CloudFront CDN

- Secured resources with IAM roles, security groups, and least-privilege access policies

AWS Data Lake Pipeline | AWS S3, PySpark, Glue, Athena, Boto3, IAM | January 2026 - February 2026

- Engineered a Bronze-Silver-Gold S3 data lake processing 10GB+ of raw data daily with automated PySpark ETL pipelines
- Cut Athena query costs by 30% by converting raw CSV files to partitioned Parquet
- Automated pipeline workflows with Boto3 and AWS Glue, reducing manual processing time by 80%

AI-Based Grayscale Image Colorization Web Application | Academic Project | May 2025

- Developed a Python web application that automatically colorizes grayscale images using OpenCV, NumPy, and a pretrained Caffe-based deep neural network
- Integrated a Flask web interface for image submission and visualization of colorized results
- Explored Generative Adversarial Network (GAN) colorization methods for realistic image reconstruction and enhancement

Outdoor Air Purification Using IoT (Team Leader, Team of 3) | B.Tech Design Project | June 2024

- Led a team of 3 and originated the concept for an IoT-based outdoor air quality monitoring and purification system
- Programmed an Arduino Uno in C/C++ to read PM2.5, temperature, and humidity sensors and switch a purification fan on when PM2.5 exceeds 50 micrograms per cubic meter
- Documented the system in a 38-page project report with architecture, data flow, use case, activity, sequence, and state diagrams

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science | K. Ramakrishnan College of Technology, Tiruchirappalli, India | 2021 - 2025

CGPA: 7.31/10

Relevant Coursework: Cloud Computing, Computer Networks, Database Management Systems, Big Data Analytics, Machine Learning

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (In Progress)
- Cisco Certified Network Associate (CCNA) (In Progress)
- Excel with AI Certification
- SQL | Skillrack
- Masters in Coding: Data Analysis, Networking, Cloud Computing and Cyber Security | KaaShiv InfoTech, Chennai | February 2026
